

Commercial Services: Faucets

Almost every type of business has at least one faucet on the property. Schools, hospitals, hotels, restaurants, apartment complexes and other large businesses may require many different types of faucets. And, in many cases, these faucets might be used by lots of people every day, generating hundreds or thousands of gallons of water each day.

Commercial Faucet Services

Affordable Drain Cleaning's skilled and professional plumbers can repair, replace or install any type of commercial or industrial faucet, for any size of business and in any location, including kitchens, bathrooms, bar areas, laundry areas, laboratories, operating rooms, basements and more:

- Sink, tub and shower faucets
- Automatic sensor and hands-free faucets
- Pre-rinse faucets
- Water stations and fillers
- Dip well faucets
- Pot filler faucets
- Low flow and water conserving faucets
- Bed pan cleaner faucets
- Hose bibs
- Vacuum breakers
- Waste valves
- Water shut off valves
- Backflow preventers

Leaking faucets, those that don't turn on or off properly, and faucets that fail to correctly control the water temperature can cause damage to your property or be harmful to users. Affordable Drain Cleaning experts will ensure that your faucets operate as intended to ensure that your business remains in operation. We use only quality parts and materials when rebuilding, replacing or installing a faucet.
